SUMMARY

Highly skilled in Java, JavaScript, PHP and MySQL, with a strong focus on data-driven storytelling and end-to-end project execution Secured 3rd rank during MCA, showcasing expertise and Process review & optimization in delivering impactful business insights and staying updated with the latest web development technologies.

PROJECT

Calorie Detection App Using Python.

Developed a cloud-based app using MySQL, ensuring secure user data storage and real-time calorie tracking. Designed an optimized UI/UX design for smooth navigation and efficient image processing, reducing latency. Streamlined processes with a focus on task prioritization and time management to meet deadlines

Crunchy Bites Website Using JSP

Implemented backend systems with JDBC for seamless order management and inventory tracking. Implemented payment systems with secure transactions. Analyzed user feedback to continually improve the platform's performance and enhance user experience.

TVs Bike Selling Website Using PHP.

Created an e-commerce website with user authentication, profile management, and advanced bike model filters. Increased website visibility and traffic through effective optimization strategies. Demonstrated strong decision-making skills to address key performance and usability issues.

Municipality Grievance Guard.

Citizens can register, log in, submit grievances with details, track their status, and municipal authorities can review and address complaints via an admin panel. MySQL securely stores data, while a user-friendly HTML/CSS interface, email notifications, search filters, and a statistical dashboard enhance grievance management.

CERTIFICATION

JavaScript and Java Certification

Demonstrating expertise in system-level programming and database management.

Research Paper Presentation

Presented a research paper at Bedhar University, showcasing innovative insights and analysis.

Painting

Earned a Painting Certification reflecting passion and expertise in visual arts."

INTEREST

- Music
- Reading Books
- Travel
